Professional Summary

I have been an average student during my early school days but a consistent progressor. Even though academically mediocre, I have always been a forerunner in sports and other extracurricular activities.

Education

B.Sc. in Physics

Sibsagar University previously Sibsagar College, Sivasagar, Assam

- Physics(Honours), Chemistry(generic), Web Designing(SEC)

- GPA: 7.27

Projects

Project P1: Project I: Similarity Checking from Books

Write a C++ Program to identify 10 similar pairs of text books from a given set of 64 text books in txt format.

A simple (but crude) way to measure similarity is given as following:

Identify top 100 frequent (normalize) occurring words in a text file. Consider only the numeric character and alphabet character (by converting both small and capital alphabets to capital form) of the text file. Normalize the word count of a file by

dividing the total number of words in the file.

◦ remove commonly occurring six specific words "a", "and", "an", "of", "in" and "the" from the file at the time of counting frequent word, total number of word and the normalized frequency.

Similarity index of two files can be calculated as sum of normalized value of all the frequent words occurring in both the files.

Create a 64x64 size similarity matrix.

Report top ten similar pairs of text books using the similarity matrix. You need to exclude the self similarity.

- Completed

Skills

- Technical: Adobe Illustrator, Procreate, Power Point, Excel, C++, SciLab, Canva, SQL

- Soft Skills: Communication, Leadership

Certifications

- Online Training Program on Overview of Space Science – ISRO 2023

- LED Light Repair Technician – NCVET/SkillHub 2022-23

- Take Charge Global Battery Experiment – Royal Society of Chemistry/IIT Guwahati 2022

- 2 Certifications in NPTEL courses

Extracurricular / Volunteering

Team Leader – Smart India Hackathon, 2022

- Winner at the College Level. Have progressed further to the zonal level
